

# DoDAF Toolkit™

The *only* comprehensive software, training and consulting solution for meeting Department of Defense Architecture Framework (DoDAF) requirements

Wizdom understands the complexities of becoming fully Department of Defense Architecture Framework (DoDAF) compliant. That's why we created **DoDAF Toolkit**.

DoDAF Toolkit is software, training and consulting solution package, which helps you meet your DoDAF requirements!

DoDAF Toolkit contains the best of the best of what we've learned through years of working with the U.S. government and private sector organizations to effectively plan, manage, build and complete all of your DoDAF projects.

## Here's what's in DoDAF Toolkit:

**DoDAFLive!:** powerful web-based DoDAF management tool

**Wizdom Works!:** comprehensive process, activity, data and UML modeling tool

**Expert DoDAF Consulting:** step-by-step, our "Wizards" will lead you through the technical and architectural requirements provided by the DoD.

**Comprehensive DoDAF Training:** hands-on, real-world DoDAF workshops

## DODAFLive!

Web-based tool provides step-by-step guidelines for *full compliance* with the new DoDAF standards

**DoDAFLive!** is a powerful web-based DoDAF tool that manages DoDAF activities and their associated products to ensure DoDAF compliance according to DoDAF and OMB Circular-130.

**DoDAFLive!** contains a complete DoDAF template which includes all the information and steps needed to complete all the associated work products of OV, SV and TV. This software solution gives step-by-step guidelines to complete all of your DoDAF work products to result in compliance with the new and evolving standards.

### A Team Effort, *without the effort*

Team members upload their work products in context to the DoDAF template and project plan. Every team member knows where they need to go, how to find information and where to deposit their work.

**DoDAFLive!** contains a project management engine and a corresponding repository so all DoDAF team members can work on every aspect of the project. All the information, models, documentation and files are stored in one location on the Internet or intranet.

Wizdom's acclaimed **11 Step DoDAF Minimalist Methodology** is embedded within **DoDAFLive!** DoDAF Minimalist Methodology includes a template and work product examples to help the DoDAF project team understand the process and products for DoD compliance.

## WIZDOMWORKS! FOR DODAF

### DoDAF Product Building Tools

This comprehensive process, activity, data and UML modeling tool helps you to build graphical and textual DoDAF products as well as analyze your AS-IS and TO-BE situation in terms of time, cost and quality - the essence of your KPPs.

Use *WizdomWorks!* to build work products, OV-2, OV-4, OV-5, OV-6A, OV-7, SV-4, AV-2, & SV-11 using IDEF0 and UML Diagrams. Define and analyze your KPPs:

- Map and Improve all Your Processes Using IDEF0 and UML
- Evaluate Current Architecture Design Perform Structured Analysis Modeling Define Interoperability Requirements
- Create and Evaluate Required Framework Products

### EXPERT DODAF CONSULTING

*Our consulting leads to your success.*

Wizdom helps you meet the technical and architectural requirements necessary to be DoDAF compliant. Wizdom's expert consultants lead you step-by-step incorporating compliance guidelines to ensure your technologies, systems and architectures meet the requirements.

You will use our methodology to design your operational, technical, and systems views and products that are consistent with the DoDAF guidelines. Wizdom provides your organization with:

- A Comprehensive Methodology for complying with the DoDAF Requirements
- Step-By-Step Strategies for DoDAF Implementation
- Best Practices for Complying with DoD's Standards
- Proven Methods for Building, Packaging & Selling Your Framework- Compliant Products

## COMPREHENSIVE DODAF TRAINING

**We bring our experience to develop your expertise.**

In our hands-on workshop, you will use a comprehensive methodology for designing operational, technical, and systems architecture views and products consistent with the DoDAF guidelines.

In the workshop, you will apply DoDAF compliance concepts and principles to design your own DoDAF-compliant system. You will use the most up-to-date tools and techniques for creating and evaluating required architectural products. You will learn strategies proven successful for saving time while avoiding costly pitfalls when meeting DoDAF requirements.

Critical issues discussed include:

- A Complete Handbook to the DoDAF Process
- Examples and Exercises of Successful Framework Design
- Answers to Creating associated work products of the AV, OV, SV and TV's
- Proven Methods for Getting Your Framework Design Approved

### PRICING AND AVAILABILITY:

**DoDAF Toolkit is available** as a complete package, or you can buy individual components separately.

For information on Wizdom's **DoDAF Toolkit**, and Wizdom's complete range of products and services, contact Steven Kroll at (630) 357-3000 ext. 3010, [skroll@wizdom.com](mailto:skroll@wizdom.com) or visit Wizdom's website at <http://www.wizdom.com>
